

# LRID – Academic / MBA–DBA Report

Participant: LRID-20260110-0455

Date: 2026-01-10

Version: LRID v1.0

## Learning Summary

**Profile statement:** A generally stable decision-maker balancing speed with governance discipline.

**Main trade-offs:** Speed and autonomy vs. correction bandwidth and procedural rigor under pressure.

## Scores & Interpretation

Dimension	Score	Band	Interpretation
-----------	-------	------	----------------

## Framework Interpretation

This profile can be interpreted through governance guardrails, decision-cycle design, and bias-mitigation frameworks.

## Consistency & Bias Awareness

Consistency checks are not enabled in the current 22-item version (planned extension).

- Consistency checks: not enabled in 22-item version (planned extension).

## Reflective Prompts

1. Which dimension shows the highest variability under pressure and why?
2. What would improve correction openness in your decision cycle?

3. Where do you most often trade ethics for speed?

## Methodological Note

**What this measures:** Decision integrity, resilience under pressure, manipulation awareness, attention control, power handling, and ethical drift resistance.

**What this does not measure:** Personality traits, intelligence, emotional disorders, or mental health conditions.

**Limitations:** Results depend on context, pressure level, response accuracy, and situational variables at the time of assessment.

Results should be interpreted by qualified professionals within an organizational or educational context.
